

O2, Redevelopment (Multi use premises)

Project Value: £600K

Programme: 6 months (2007)

Emcor Engineering Services required installation of Mitsubishi Water cooled VRF systems and Sanyo air cooled VRF systems throughout the entire site to provide comfort cooling to all back of house areas, meeting room and sport club facilities. This was an exciting and quick program finished on time for its grand re-opening in summer 2007.
